PROJECT NAME:	AI FAQ Assistant API
MAXIMUM MARKS:	2Marks

Proposed Solution:

The proposed solution for the AI FAQ Assistant API is to build a secure, AI-powered FAQ management platform using Node.js, Express.js and MongoDB. The system will allow users to register and log in, manage FAQ records, and use Google Gemini AI to generate answers and suggest relevant topics, It will also provide semantic search to find the most relevant information quickly, enabling faster and smarter customer support.

Purpose:

- Provide a secure and user-friendly platform for creating, SSmanaging and searching FAQ records.
- Use Google Gemini AI to generate accurate answers and suggest topics.
- Enable semantic search to find relevant support information quickly.

- Allow authenticated users to ask questions and get AI-assisted answers.
- Help support teams reduce backlog and improve customer satisfaction.
